Abstracts

The global Neonatal Thermoregulation market was valued at 1927.04 Million USD in 2021 and will grow with a CAGR of 3.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The significant problem in neonates at birth is management of temperature and this contributes to significant morbidity and mortality. Low birth weight is the major cause of hypothermia and hyperthermia due to decreased thermal insulation as a result of lack of subcutaneous fat. Newborns are prone to develop hypothermia. Neonatal thermoregulation devices are used to regulate the body temperature of newborn babies. The Europe neonatal thermoregulation market was estimated to be valued at nearly US\$ 97 Mn in 2017 and is anticipated to touch a valuation of nearly US\$ 161 Mn in 2025, displaying a CAGR of 5.2% during the period of forecast.
