In recent years, the global nerve stimulator has developed rapidly, with an average growth rate of about 8%. In 2018, about 190,000 nerve stimulators were produced globally, while sales were about \$4 billion. In 2018, China accounted for about 2% of global production. In the next five years, China's nerve stimulators will continue to grow rapidly. Nerve stimulators are mainly divided into deep brain stimulators, spinal cord stimulators, vagus nerve stimulators, and other nerve stimulators. Among them, spinal cord stimulators accounted for the largest proportion, accounting for nearly 55% of the total market in 2018, and deep brain stimulators accounted for 16%. Nerve stimulators are mainly used for pain management, Parkinson's disease, urinary incontinence and fecal incontinence, epilepsy and other diseases, of which pain management is the main application field, accounting for 55% in 2018 and Parkinson's disease accounts for 12%. The market is highly competitive. Medtronic, Abbott, Boston Scientific are the major suppliers. They have mastered key technologies and patents, and they have a fixed customer base. They have established a monopoly in the market. The industry is driven by a growing base of older people and an increase in the prevalence of chronic diseases.
