The global Nitrocellulose Membranes market was valued at 131.41 Million USD in 2021 and will grow with a CAGR of 3.47% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Nitrocellulose membranes are a popular matrix used in protein blotting because of their high protein-binding affinity, compatibility with a variety of detection methods (chemiluminescence, chromogenic, and fluorescence), and the ability to immobilize proteins, glycoproteins, or nucleic acids. The Nitrocellulose Membranes industry concentration is very high; the main large producers are not many in the world, and high-end products mainly from U.S. and Western European. Global giant manufacturers mainly distributed in U.S. Manufacturers such as Merck, Sartorius and GE Healthcare have relative higher level of product's quality. The key consumption markets locate at developed countries. The United States takes the market share of 32.42%, and Europe with 27.57%. China's consumption market occupied 8.89% in 2019. The largest application of Nitrocellulose Membranes is biopharmaceutical, which accounted for 58.94% in 2019.
