Non-silicone Release Liner is that paper or film coated on one or both sides with a special non-silicone release coating. In the coming years there is an increasing demand for Non-silicone Release Liner in the regions of United States and Europe that is expected to drive the market for more advanced Non-silicone Release Liner. Growth in government budgets in the principal countries, increasing of electronic fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Non-silicone Release Liner will drive growth in United States and Europe markets. The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.
