The global NTC Thermistor Cables market was valued at 256.77 Million USD in 2021 and will grow with a CAGR of 4.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An NTC Thermistor is a ceramic semiconductor made with various metal oxides. Their electrical resistance decreases with increasing temperature. A typical temperature range for existing ceramic negative temperature coefficient (NTC) thermistors is -80 degrees C to +300 degrees C. This resistance is processed by an electronic circuit to provide temperature measurement. The thermistor itself does not provide any control over heating elements, relays, etc. The thermistor is strictly a sensor and any electrical control would need to be implemented by the circuit utilizing the thermistor. Vishay was the global greatest company in NTC Thermistor Cables industry, with the revenue market Share of 28% in 2018, followed by TDK, TE Connectivity, Littelfuse, Ametherm, EI Sensor Technologies, AMWEI, SEMITEC Corporation, Sensor Scientific, Shenzhen Minchuang Electronic.
