The global Octamethyl Cyclotetrasiloxane (OMCT) market was valued at 225.38 Million USD in 2021 and will grow with a CAGR of 10.61% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Octamethyl Cyclotetrasiloxane (OMCT) is an organosilicon compound with the formula $[(CH_3)_2SiO]_4$. It is a colorless viscous liquid. It is a common cyclomethicone. Like other cyclomethicones, it is slightly volatile. As for the global D4 industry, the industry structure is relatively concentrated. The top ten manufacturers have 80.93% revenue market share in 2016. The Dow Corning and Bluestar which has 18.01% and 12.62% market share in 2016, they are the leader in the D4 industry. The Bluestar is the leader of China D4 industry. It sells a total of 291.76 million dollar D4 products in the year of 2016. The downstream industries of D4 products are Silicone Rubber industry, silicone compounds. In the recent years, with the limitations of government policy and sluggish economy, the consumption growth of D4 slowing down obviously. However, there still is a huge potential need for the silicone metal and its downstream products. In the foreseeable future, the D4 products will show an optimistic upward trend. In the next few years, the market will remain concentrated in the Asia Pacific region, and China will continue to be a major export country. But the profitability of manufacturers will continue to decline due to fluctuations in energy and mineral resources.
