The global Octyl Alcohol market was valued at 235.61 Million USD in 2021 and will grow with a CAGR of 5.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Octyl Alcohol (synonym name: Caprylic Alcohol) is the organic compound with the molecular formula $\text{CH}_3(\text{CH}_2)_7\text{OH}$. It is a fatty alcohol. Many other isomers are also known generically as octanols. Octyl Alcohol production is mainly concentrated in South Asia, EU and USA. At present, the output of the three regions occupies about 78.63% of global Octyl Alcohol production. The main market players are Kao Chem, Ecogreen Oleo, PTTGC, Musim Mas, Sasol, Basf and KLK Oleo, etc. Compared with a million-ton-production market size of isobutyl alcohol, Octyl Alcohol is just a small market because the downstream application of Octyl Alcohol is much smaller than the isobutyl alcohol. Octyl Alcohol can be classified into two types: industrial grade and food grade, survey results showed that 81.93% of the Octyl Alcohol market is industrial grade in 2017.
