Abstracts

The global Offshore Patrol Vessels market was valued at 208.35 Million USD in 2021 and will grow with a CAGR of 9.24% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Offshore Patrol Vessels (OPV), they may be operated by a nation`s navy, coast guard, police force or customs and may be intended for marine or estuarine or river environments. They are commonly found engaged in various border protection roles, including anti-smuggling, anti-piracy, fisheries patrols, and immigration law enforcement. They are also often called upon to participate in rescue operations. The Asia-Pacific will occupy for the most market share in following years, especially in India and Japan. North America, especially The United States and Canada, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Offshore Patrol Vessels. OPVs can be broadly classified into two types: 1) High-end war-fighting vessels with expensive weapon systems and C4I suites, 2) More basic patrol vessels, designed for sustained low intensity missions and equipped with basic gun armaments, standard navigation sensors and built to commercial standards. Which of these types a country chooses depends on its particular naval requirements, resulting from its geographic location, political aspirations and intended role of its naval force? However, the majority of OPV programmers are of the low-cost, multi-role variety. These are being used in an increasing number of roles,

including fishery protection, pollution control, fire-fighting, salvage or search and rescue (SAR), counter-narcotics, humanitarian operations and exclusive economic zone (EEZ) patrol. The OPVs market is not concentrated; there are many companies such as BAE Systems, Damen, STX Offshore & Shipbuilding, Eastern Shipbuilding Group, Austal, Dearsan Shipyard, Irving Shipbuilding, CSIC, Fassmer, Socarenam, Fincantieri, Navantia, RINAVAL and Babcock acting in the market. But each player can deliver few numbers of OPV.
