The global Oil and Gas Separator market was valued at 375.57 Million USD in 2021 and will grow with a CAGR of 2.29% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An oil/gas separator is a pressure vessel used for separating a well stream into gaseous and liquid components. They are installed either in an onshore processing station or on an offshore platform. Based on the vessel configurations, the oil/gas separators can be divided into horizontal, vertical, or spherical separators. Horizontal separator emerged as type with largest market share, and the segment is also anticipated to witness the fastest growth over the next seven years. The future market of oil and gas separator depends on the development of technology, demand and suppliers. Worldwide Installations are not performing in a high lightened way because of sluggish economy. North America was the largest consumer and accounted for over 30% of the global consumption volume in 2015. Asia is anticipated to witness the fastest growth rate over next seven years owing to dramatic development of both offshore and onshore reserves in China, Indonesia, India and Malaysia. Chinese government`s plans to exploit its shale reserves have furthered the market expansion and are expected to create immense potential for processing equipment over the forecast period
