Oleic Acid is a fatty acid that occurs naturally in various animal and vegetable fats and oils. It is an odorless, colorless oil, although commercial samples may be yellowish. In chemical terms, oleic acid is classified as a monounsaturated omega-9 fatty acid, abbreviated with a lipid number of 18:1 cis-9. It has the formula $\text{CH}_3(\text{CH}_2)_7\text{CH}=\text{CH}(\text{CH}_2)_7\text{COOH}$. The term 'oleic' means related to, or derived from, olive oil which is predominantly composed of oleic acid. Oleic Acid industry in short supply on the market in the past few years, more and more companies enter into Oleic Acid industry, the current demand for Oleic Acid product is relatively low, lack of demand, excess supply. Ordinary Oleic Acid products on the market do not sell well; Oleic Acid's price is lower than past years. The signal of market price change indicates the trend in the Oleic Acid industry, low-end product has excess capacity, and high-end product is in short supply. In 2015 the global oleic acid production reached 7.69 million tons as the average growth rate of 4.1% from 2011. In the next five years, the global consumption of Oleic Acid will grow under at a growth rate of 5%. Oleic Acid product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for

high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field. Along with the development of Chinese domestic Oleic Acid, Chinese domestic Oleic Acid has been very mature and advanced, and the performance distance has been shorten compared with the imported Oleic Acid. Developed areas such as North America, Europe, Japan are the still the main consumers, their consumptions volume share is about 65%. As large demand of high-end products at home and abroad, many companies began to enter the field of high-end. Currently, the Chinese Oleic Acid industry is not only begin to transit to high-end Oleic Acid products, while still extend in the resource-rich land and downstream industry chain.
