The global Opaque Polymers market was valued at 1573.67 Million USD in 2021 and will grow with a CAGR of 8.9% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Opaque polymer is a highly efficient, voided latex product that improves hiding and whiteness in paints and coatings, and functions as a partial replacement for titanium dioxide (TiO₂). Now formulators can use Opaque Polymer to replace TiO₂ and lower raw material costs in solventborne alkyd architectural paints. It also works in waterborne paints, providing the convenience of a single product for multiple paint lines.
