Surgical tables comprise one of the first requirements of a modern healthcare system and thus are likely to be in constant demand over the near future. There has been a gradual shift from manual operating tables to more sophisticated operating tables incorporating the latest technologies such as hydraulic and electro-hydraulic powered tables with battery systems and locking drawers to allow skilled operating theater staff to access the operating table drawers. The development of more advanced powered as well as hybrid operating equipment that can auto-adjust is likely to create new opportunities for manufacturers of operating tables in the global market. Newer and more advanced operating tables serve to increase the efficiency of the surgical process and are being increasingly preferred by surgeons across the world.
