The global Optical Biometry Devices market was valued at 24.02 Million USD in 2021 and will grow with a CAGR of 4.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Optical Biometry also called as partial coherence interferometry (PCI) is an essential method used by ophthalmologist in clinical practice for accurate measurement of the anatomical characteristics of the eye. Accurate measurement are essential in determining the correct power of an IOL before it is implanted into the patient eligible for cataract surgery. With the help of Optical Biometry Devices, the accurate power of lens is determined. Optical Biometry Devices is widely used due to non-invasive, easy to perform and comfortable for the patients. Optical Biometry Devices are capable enough of taking numerous measurements including axial length, anterior chamber depth, corneal thickness and lens thickness. All the measurements are taken at a single ophthalmology workstation. As compared with ultrasound biometry, which is an invasive procedure and which required direct contact of cornea and the use of anesthetics which can be uncomfortable for the patients. The global optical biometry devices market is expected to grow at a healthy growth rate over the forecast period. On the basis of product type, it is segmented into contact type and non-contact type. A non-contact biometry devices does not require any contact with eye and hence avoid risk of corneal abrasion and is preferred by the ophthalmologist. Hospitals segment cover the major

share in the global optical biometry devices market due to their easy availability of optical biometry devices followed by Ophthalmology Clinics.
