Abstracts

The global Oral Contraceptive Pills market was valued at 1415.8 Million USD in 2021 and will grow with a CAGR of 3.81% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Oral contraceptive pills are birth control pills including progestin and estrogen hormones. These hormones induce contraception/birth control by preventing ovulation. These pills are also known as combined pills or combined oral contraceptive pills (COCP).By type of product, the oral contraceptive pills market has been segmented into progestin-only, combination, and others. The combination oral contraceptive pills segment led the overall market in 2014 and is projected to register the highest growth rate over the course of the forecast period. This growth can be attributed to their higher efficiency in preventing pregnancies, their easy availability, and their rising preference among consumers.
