## Abstracts

The global Organic Hair Color market was valued at 1126.81 Million USD in 2021 and will grow with a CAGR of 6.67% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hair color, also known as hair colorant or hair dye, is the sub-segment of the broad category of hair care products. Hair color products contribute to more than one-fifth of the global hair care market. Hair care broadly includes five types of products. These include shampoo, hair color, hair conditioner, hair styling products, and hair oil. The trend of hair care has been growing in the fashion industry due to the global aging population base. Organic hair color is manufactured by using organic ingredients or certified organic ingredients. The ingredients are usually plant based such as henna, dry fruits, various vegetables, flower extracts, and many more. The product might either be 100% organic or many contain certain percentages of synthetic formulations. Organic hair color balances and sustains the hair shaft to prevent breakage and over drying.
