The global Organic Pigments market was valued at 722.03 Million USD in 2021 and will grow with a CAGR of 4.96% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Organic pigments are colored, black, white or fluorescent particulate organic solids which usually are insoluble in, and essentially physically and chemically unaffected by, the vehicle or substrate in which they are incorporated. They alter appearance by selective absorption and/or by scattering of light. Organic pigments are usually dispersed in vehicles or substrates for application, as for instance in the manufacture of inks, paints, plastics or other polymeric materials. Organic pigments retain a crystal or particulate structure throughout the coloration process. In the world wide, major manufacturers mainly are BASF, Clariant, DIC, Huntsman, Toyoko, North American Chemical, Lily Group, Heubach Group, Sudarshan, Jeco Group, Xinguang, Sanyo Color Works, Shuangle, Flint Group, Cappelle Pigment, DCC, Dainichiseika, Sunshine Pigment, Apollo Colors, FHI, Ruian Baoyuan, Yuhong New Plastic, Hongyan Pigment, PYOSA, KolorJet Chemicals, Everbright Pigment, and etc. The migration of the organic pigments business to Asia, particularly China and India, continues. Since the mid-1990s, production in China and India has rapidly increased; China is now the world's largest organic color pigment producer, especially for commodity-type pigments. Additional medium-tier to higher-value organic pigments also migrates to China from

North America, Europe and Japan. Production in Europe, USA and Japan continues on a downward trend as the market has become globalized and gross margins have been squeezed. To organic pigments global application, in 2015, Printing Inks account for 30% of demand, Paints & Coatings about 38%, Plastics & Rubber about 26% and other industries such as textiles for the remainder. The printing market for publication of newsprint and periodicals has fallen as a result of competition from the internet, but demand for printing inks for packaging remains strong.
