Abstracts

The global Oven Controlled Crystal Oscillator (OCXO) market was valued at 13.95 Million USD in 2021 and will grow with a CAGR of 5.16% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The OCXO is an oscillator which is temperature controlled (ovenized crystal controlled oscillator). This type of oscillator has a temperature controlling circuit to maintain the crystal and key components at a constant temperature. OCXOs are typically used when temperature stabilities on the order of $\pm 1 \times 10^{-8}$ or better are required. While this type of oscillator has a tenfold improvement over a TCXO for temperature stability, the OCXO tends to be higher in price and consumes more power. Typical power at +25°C ambient is 1.5 Watts to 2.0 Watts in a steady state condition. After several months of survey and research, research group obtains the following conclusions: With the development of science and technology, the market of oven controlled crystal oscillator is great. And in the high-technology ecosystem, the oven controlled crystal oscillator industry offers many benefits to the world, especially to the undeveloped countries. There are two kinds of oven controlled crystal oscillator (SMD Shape, PIN Shape), Report data showed that 71.86% of the SMD Shape market demand in OCXO, 28.14% in PIN Shape in 2017.
