The global Overhead Conveyor System market was valued at 1402.91 Million USD in 2021 and will grow with a CAGR of 3.54% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Overhead conveyor Systems are unique from other conveyor types in that they operate above - or over - the head of both workers and other equipment. They maximize conveyance by utilizing unused overhead space, and do so via a revolving, endless loop of chain within a rigid track, or a straight run of trollies. For the major players of overhead conveyor system, the Daifuku maintained its first place in the ranking in 2019, followed by Dematic, SSI Schaefer, etc. The Top 3 players accounted for about 35% market share of the overhead conveyor system. According to regions, Asia-Pacific dominated the entire market of the overhead conveyor system with about 45% of the global market share in 2019.
