Oxygen is a chemical element with symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table and is a highly reactive nonmetal and oxidizing agent that readily forms oxides with most elements as well as other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two atoms of the element bind to form dioxygen, a colorless and odorless diatomic gas with the formula O₂. This is an important part of the atmosphere and diatomic oxygen gas constitutes 20.8% of the Earth's atmosphere. Additionally, as oxides the element also makes up almost half of the Earth's crust. Major factors driving growth of this market include the stable development of metallurgy, ceramics, glass, medical and other industries, the improvement of Oxygen-generating Technology, Decline in production costs, The currently promoting energy-saving and emission-reduction by government. Asia-Pacific market is expected to become the fastest growing market, increasing product availability is the key point. Asia-Pacific is poised to grow at the highest CAGR during the forecast period owing to Rapid development of metallurgy, medical treatment and chemical industry, increasing environmental awareness in this region, and rising focus of prominent players on the APAC market increasing technology level. The average price

will fall further The product average price declined in the past few years due to the technology development, the average price will keep this trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. Strong market competition is resulting in annual 3 percent price erosion. Applied to the Medical areas will become a new growth point Increasing demand for safe and user-friendly technologies, and geriatric population growth with long-term respiratory disorders is expected to global medical oxygen market size over the forecast period. In terms of geography, developed markets of the U.S. and Europe will continue witnessing steady demand, while market will largely be driven by Asia Pacific during forecast period.
