## Abstracts

The global Ozone Generation Technology market was valued at 13.52 Million USD in 2021 and will grow with a CAGR of 6.42% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Ozone generators work by combining oxygen (O<sub>2</sub>) with energy to produce ozone (O<sub>3</sub>). When the oxygen molecules are exposed to energy, the two atoms are broken apart. The single oxygen atoms quickly bond in groups of three to form ozone. In the coming years there is an increasing demand for ozone generators in the regions of North America and Europe that is expected to drive the market for more advanced ozone generators. Increasing of medical fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of ozone generators will drive growth in China markets. Globally, the ozone generators industry market is low concentrated as the manufacturing technology of ozone generators is relatively matures than some high-tech equipment. And some enterprises, like Suez, De Nora Permelec Ltd, BWT Pharma & Biotech and Biowell, etc. are well-known for the wonderful performance of their ozone generators and related services. At the same time, Europe, occupied 35.47% production market share in 2016, is remarkable in the global ozone generators industry because of their market share and technology status of ozone generators. The consumption volume of ozone generators is related to downstream

industries and global economy. As there will always be some uncertainty in the global economy in the following years, the growth rate of ozone generators industry may not keep that fast. But it is surely forecasted that the market of ozone generators is still promising.
