Abstracts

The global P-Toluenesulfonic Acid market was valued at 1.85 Million USD in 2021 and will grow with a CAGR of .93% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

P-Toluenesulfonic Acid is an organic compound with the formula $\text{CH}_3\text{C}_6\text{H}_4\text{SO}_3\text{H}$. It is a white solid that is soluble in water, alcohols, and other polar organic solvents. As with other sulfonic acids, P-Toluenesulfonic acid is a strong organic acid. It is about one million times stronger than benzoic acid. It is one of the few strong acids that is solid and, hence, conveniently weighed. Also, unlike some strong mineral acids (especially nitric acid, sulfuric acid, and perchloric acid), P-Toluenesulfonic acid is non-oxidizing. USA, China, Taiwan, Japan, Germany are now the key producers of p-toluenesulfonic acids. There are many producers in China, but the price is relatively lower and the production process is relatively uncultured. The high quality products are mainly supplied by overseas producers. Stepan, Kao Koan Enterprise, Helm AG, Lianyungang Ningkang Chem, Konan Chem and Bravo Chem are the key producers in the global p-toluenesulfonic acids market. Top six took up about 45% of the global market in 2015. Stepan is the leading producer over the world. Lianyungang Ningkang Chem, Nanjing Ningkang Chem, Shunfuyuan Chem and Shengxinheng Chem are the leading supplier in China with the total local share of about 46%. Konan Chem is a leading supplier in Japan.
