The global Pad Mounted Switchgear market was valued at 51.7 Million USD in 2021 and will grow with a CAGR of 9.82% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Solid dielectric type pad-mounted switchgear is currently fast growing technology introduced by G&W Electric (U.S.) and is considered as the best alternative when compared to conventional oil insulated pad-mounted switchgears. Solid dielectric insulations make these switchgears suitable for wet and corrosive environment, vertical or horizontal mounting, and use in any altitude. Also, since epoxy is inert and, environmental friendly, no EPA usage restrictions are implied making it easily acceptable in the market. The increasing demand for Pad Mounted Switchgear drives the market. Increasing transmission and distribution investment and high efficient underground distribution systems are key factors to drive the growth of market. The underground distribution system is growing rapidly owing to shift change in trend. It amplifies the reliability and efficiency of the electrical supply with the advantage of being less susceptible to lightning and offers easy diagnosis of faults. U.K. and France are the fastest growth markets in the region. Europe is expected to have the largest market share for pad mounted switchgear. The market is driven by replacement of existing transmission system, improving the reliability of the grid and switching from overhead line to underground transmission systems. Asia pacific is expected to have moderate

growth in this pad mounted switchgear market owing to high initial cost for the replacement of existing transmission system.
