The global Paint Remover market was valued at 117.52 Million USD in 2021 and will grow with a CAGR of 7.04% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Paint remover (also known as paint strippers or strippers) is a mixture liquid consisting of chlorinated hydrocarbons, ketones, esters, alcohols, benzene and other solvents. It utilizes the solvent's osmotic swelling characteristics to the coverings, with which the paint can be directly peeling or make the coating peeling easier. The global Paint remover industry mainly concentrates in China, North America and Europe. The global leading players in this market are WM Barr, Savogran, Dumond Chemicals, Absolute Coatings, Fiberlock Technologies, Sunnyside, Packaging Service Co., Motsenbocker, Akzonobel, Henkel, 3M, Green Products, Hairi Cleaning, Franmar Chemical, PPG (PPG Aerospace), Formby's, GSP, Certilab, Cirrus, ITW Dymon, EcoProCote, EcoProCote, EZ Strip, Dad's Easy Spray, Auschem, Kimetsan Group, Changsha Guterui, TIMEASY, and etc. The impact of technology on paint remover is growing. Innovation is crucial in the development of formulations of paint remover. The reason why the domestic product's price is relatively lower, is just because the product formulation is relatively old, and the application range is relatively narrow. For example, during the preparation of paint remover, generally will added paraffin. Although it can prevent excessive evaporation of the solvent, but after stripping, paraffin is often left in the surface, and it

requires thoroughly remove, which gives a big inconvenience to the following painting.
