Pallet rack is a material handling storage aid system designed to store materials on pallets (or skids?). Although there are many varieties of pallet racking, all types allow for the storage of palletized materials in horizontal rows with multiple levels. Since the Second World War, pallet racks have become an essential and ubiquitous element of most modern warehouses, manufacturing facilities, retail centers, and other storage and distribution facilities. Globally, the Pallet Rack industry market is low concentrated as the manufacturing technology of Pallet Rack is relatively matures than some high-tech equipment. And some enterprises, like Averys, SSI Schaefer, Unarco Material Handling, etc. are well-known for the wonderful performance of their Pallet Rack and related services. At the same time, North America, occupied 27% sales market share in 2017, is remarkable in the global Pallet Rack industry because of their market share and technology status of Pallet Rack. The consumption volume of Pallet Rack is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Pallet Rack industry may not keep that fast. But it is surely forecasted that the market of Pallet Rack is still promising.
