Abstracts

The global Patient Handling Equipment market was valued at 1134.07 Million USD in 2021 and will grow with a CAGR of 5.73% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Patient handling in healthcare facilities such as hospitals and ambulatory surgical centers involves the use of assistive devices such as lifts, stretchers, wheelchairs, beds, trolleys, and grab rails to ensure that patients can be mobilized, transferred, or repositioned safely and to avoid the performing of high-risk manual patient handling tasks by care providers. Europe is expected to account for the largest share of the global patient handling equipment market, by region, in 2018, followed by North America. North America is projected to grow at the highest CAGR in the forecast period due to strict government regulations mandating the use of patient handling equipment.
