PE foam tape is PE foam as backing, coated on both sides with strong solvent acrylic adhesive, covered with PE plastic film or yellow silicone paper or white silicone paper or glassine silicone paper as release paper liner. Polyethylene Foam Tapes combine a rubber-based adhesive with conformable closed cell foam. The rubber based adhesive provides a good initial bond to a variety of surfaces. Global PE foam tapes market is expected to grow and gain traction during the forecast period owing to features such as huge internal strength and good flexibility reducing peeling stress. Furthermore, eco-friendly concept, shock absorption capability, and good anti-aging properties are some of the factors which are expected to fuel the global PE foam tapes market during the forecast period. Moreover, good anti-vibration properties, long-term holding power, excellent resistance to moistures & solvents, and excellent conformity are few other driving factors for global PE foam tapes market during the forecast period. Currently, there are many players in this market. 3M, Tesa (Beiersdorf AG), Scapa, Mactac (Lintec), Avery Dennison, Saint-Gobain, ADDEV Materials, Achem (YC Group) and some others are playing important roles in PE foam tape industry. China is estimated to dominate the global PE foam tapes market during the forecast period due to high

penetration of building and automotive industry, with approximately 34.98% of market sales contributed by China. Further, United States market is estimated to be at the second highest market about 20.15% sales share owing to growing awareness among customers for better quality and more reliable products rather than going for the inexpensive ones. The sales share growth in the European region is relatively stable. Shifting focus of automotive manufacturers to open manufacturing facilities in Mexico and Brazil are estimated to drive the PE foam tapes market in Latin America during the forecast period. Middle East and Africa is expected to register substantial growth over the forecast period owing to growing construction activities in GCC countries. Japan is anticipated to register relatively slower growth due to high penetration of foam tapes in the region.
