Pelvic organ prolapse, or POP, is the dropping of the pelvic organs caused by the loss of normal support of the vagina. There are 5 types of POP; organs that can prolapse are the bladder (cystocele), intestines (enterocele), rectum (rectocele), uterus (uterine), and vagina (vaginal vault). The technical barriers of pelvic organ prolapse repair device are high, resulting in fewer manufacturing enterprises. In vaginal mesh market, key players are Ethicon, Bard Medical, Endo Boston Scientific and Coloplast, which shows a combined global production market share of 86.67% in 2015. For vaginal pessary market, the key players are CooperSurgical, MedGyn, Personal Medical Corp, Integra LifeSciences, Panpac Medical and Medesign. The market of vaginal Pessary is more separated, with the top four players takes 51.79% of global production market share in 2015. Pelvic organ prolapse repair devices are used by women suffering from POP. Vaginal childbirth and menopause are the 2 leading causes of pelvic organ prolapse; POP studies frequently have prominent numbers of women over the age of 50 and Caucasian, rather than including young women who have given birth and a more diverse balance of women from multiple races and nationalities. With improving of women`s healthiness awareness in worldwide, demand for pelvic organ prolapse repair

device is expected to continue increasing during the remaining years of the forecast period of 2017-2022. Pelvic organ prolapse repair device industry will usher in a stable growth space. In the past few years, the price of pelvic organ prolapse repair device has slightly decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of pelvic organ prolapse repair device.
