Abstracts

The global Pentane market was valued at .98 Million USD in 2021 and will grow with a CAGR of 5.57% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Pentane is colourless with a very low odour and high volatility thanks to its low, narrow boiling range - it is among the lowest boiling hydrocarbon liquids and so evaporates at a very high rate. It is used principally as a blowing agent in foam production, as a propellant in aerosols and as reaction media for polymerisation processes. In actual production, pentane blend is the most common type. Isopentane and Normalpentane Blend contain Isopentane and Normalpentane as the main ingredients. The single principal content is not less than 10%, not more than 90%. Pentane blend is a very fast evaporating hydrocarbon solvent and low in impurities such as sulphur, olefins, benzene and total aromatics. Examples of end uses for this solvent are blowing agent, electronic cleaning and polymerisation. In the report, we mainly cover pentane blend. As China's EPS market continues to grow, China has become the world's largest producer and consumer country. Europe is the second largest consumer area. The downstream customers of Japan, Southeast Asia and India are less. As a result, the markets in these areas are small. In the future, India and Southeast Asia market is expected to show some growth. In the world, the main consumers are BASF, SABIC, INOES and Huntsman. In recent years, global crude oil prices have been declining. As a downstream product, the price of pentane is declining. In the future, the price of crude

oil will rise. So we think the price of pentane will rise.
