The global Peony market was valued at 44.47 Million USD in 2021 and will grow with a CAGR of 3.51% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Peony is a flowering plant in the genus *Paeonia*, the only genus in the family *Paeoniaceae*. Peony varieties with huge, double flowers will be the focal point of the garden when they bloom in early summer. Single-flowered types are more subtle and combine well with other perennials. Flower colors include pink, red, white, and yellow, and the plants grow 18 inches to 3 feet tall, depending on the variety. Peonies make an attractive low hedge. However, they can take up to 3 years to mature, and don't perform well in hot summer climates. Currently, the Netherlands peony occupy the absolute position, but the next few years there will be some change in the situation, his market will gradually be swallowed by other countries, especially China and the United States. Although the Peony market is fire, but because they need high technology to storage and transport, meanwhile with high inspection standards, if cannot supported by the facilities, research do not recommended for new manufacturers to enter the field.
