Pepsin is a type of aspartic acid hydrolase whose zymogen (pepsinogen) is released by the chief cells in the stomach and that degrades food proteins into peptides. It is also a type of protease. The Pepsin industry concentration is very high; there are several key manufacturers in the world, and located in Italy, India and China. This report not included the product that the produced for own use. The key players are A. Constantino & C. (IT), Mitushi Pharma (IN), Biolaxi Corporation (IN), Kin Master (BR), Feideli Pharmaceutical (CN), Sichuan Deebio Pharmaceutical (CN), Chongqing Qquanxin Xiangsheng (CN) and Sichuan Biosyn Pharmaceutical (CN) China is the No.1 players, it takes about 2/3 of the global market production, Italy has a big producer, i.e. A. Constantino & C. (IT), who mainly sell its products to Europe and Japan market. With the manufacturing process developing, the activity of pepsin is increasing, now the actively of 1:10000 product take majority of the market. In the applications area, the developed regions like Europe have three main applications: 1. Inspection and quarantine: such as pig ciliates 2. Pharmaceuticals 3. Health supplements But to the developing regions like China, the downstream are concentrated in Pharmaceuticals, the health supplements product is few, also for inspection and quarantine. The key consumption markets locate at Europe, Americas and China. The Europe takes the

market share of 35.4%, followed by China with 34.7%, North America with 9.7% in revenue. The prices between different producers are different. The price of high activity is above double with that of low activity ones. For the same activity, the price from Italy is about 60% higher than that of in China.
