A perforating gun for perforating earth formations, primarily in oil and gas wells. The gun includes a straight metal tube in which explosive jet charges are carried. For industry structure analysis, the Perforating Gun industry is relatively low concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 53 % of the revenue market. Regionally, Middle East & Africa is the biggest revenue area, also the leader in the whole Perforating Gun industry. For price trend analysis, a key variable in the performance of Perforating Gun producers is raw material costs, specifically the speed at which any increase can be passed through to customers. For forecast, the global Perforating Gun revenue would keep increasing with annual growth rate with 9.12%. We tend to believe that this industry still has a good future, considering the current demand of Perforating Gun.
