The global Peristaltic Pump market was valued at 74.04 Million USD in 2021 and will grow with a CAGR of 3.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A peristaltic pump works by pressure and displacement. It operates by allowing fluids into a hose. The fluid then flows into the pump casing through the hose. Once there, a rotor with a number of rollers compresses the tube forcing the liquid on through the pump and directing it to its final destination. This technique is known as peristalsis. Thus, the tool is called a peristaltic pump. As international economic situation is complicated, in the next few years there will be many uncertainties although. Due to the government's policy and the high sales of peristaltic pump in the international market, the current demand for peristaltic pump product is relatively high in the mature market. Peristaltic pumps sales have grown 244937 units to 920790 units by the end of 2015. Global sales revenue is forecasted to grow to 810.78 million USD with both the new and retrofit markets combined. Watson-Marlow is the leader of peristaltic pump and occupied 14.98% in 2015. Other company of this industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. And the top five sales (Cole-Parmer, VERDER, ProMinent, THOMAS, Randolph) account for 30.14% of the revenue market.
