Abstracts

The global Pet Doors market was valued at 43.97 Million USD in 2021 and will grow with a CAGR of 6.89% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A pet door or pet flap (also referred to in more specific terms, such as cat flap, cat door, dog door, or doggy door) is a small portal in a wall, window or human door to allow pets to enter and exit a house (or other structure) on their own without needing a person to open the door. Originally simple holes, the modern form is a hinged and often spring-loaded panel or flexible flap, and some are electronically controlled. They offer a degree of protection against wind, rain, and larger-bodied intruders entering the dwelling. Similar hatches can let dogs through fences at stiles. Pet Doors industry is relatively fragmented, manufacturers are mostly in the North America and Europe. Among them, North America output volume accounted for more than 41.26% of the total production of global Pet Doors in 2017. PetSafe is the world leading manufacturer in global Pet Doors market with the market share of 10.92%, in terms of revenue.
