The global Pet Shampoo market was valued at 414.93 Million USD in 2021 and will grow with a CAGR of 7.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Pet shampoo is a specialized pet care product that cleanses, conditions, and deodorizes pets` coat and skin. Pets often get dirty and soiled, due to their outdoor movements, wandering and lying on dirty surfaces and hence need to be cleaned occasionally. The most common pets around the globe are dogs and cats, who have a hairy coating and hence are prone to getting infected with flea and ticks. This also increases the risk of growth of bacteria in their bodies. Pet shampoos are manufactured, taking into consideration the pH value of pet skin and hence are a lot milder than human shampoos. Additionally, most shampoos are medicated to treat a range of pet problems such as fleas, ticks, dandruff, skin issues and so on. Since they are medicated, it is recommended to leave the shampoos on the skin for five to ten minutes before rinsing off. These shampoos often form less lather, due to the limited use of sulfate, in order to suit their sensitive skin. Manufacturers are formulating new and innovative products to make the pet shampoos more effective and suitable for the required pet skin or hair. The usage of these shampoos regularly makes the pet hair soft and shiny. This report studies the global Pet Shampoo market status and forecast, categorizes the global Pet Shampoo market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan and China etc.
