The pH test strips is used to measure the pH value of the solution. Dip the head of the test strip into the solution, and the acidity and alkalinity of the solution can be known by comparing the color change of the test strip with the standard color chart. Usually pH test strips is prepared by thymol blue, methyl red, methyl orange, bromothymol blue, phenolphthalein, and solvent in a certain ratio and then dried on strip, because it contains indicators indicating different pH ranges. And different indicators display different colors, so you can rely on rich color changes to indicate a wide pH value. pH Test Strips is widely used to Education, Laboratory and Healthcare. The most proportion of Blood Glucose Test Strips is used for Laboratory, and the sales proportion is about 31.67% in 2018.
