Abstracts

The global Pharmaceutical Packaging Machines market was valued at 59.56 Million USD in 2021 and will grow with a CAGR of 4.04% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Packaging machines are machines that complete stages of the packaging process. Examples include filling machines, sealing machines, wrapping machines, strapping machines, labelling machines and coding machines. Pharmaceutical packaging machines are often custom-designed to handle specific product configurations such as vials. The growth of the market can be attributed to factors such as cost containment in pharma R&D, growth in funding for generics and biopharmaceutical research, and technological advancements in labeling and serializations solutions. The development of production lines for small batch size and research purposes, growing focus of pharmaceutical manufacturers to cut operational costs, and rising emphasis on labeling and serialization for anti-counterfeiting of drugs are the key trends in the market. However, growing preference for refurbished packaging equipment as a viable alternative to new packaging equipment with high costs is expected to restrain the market growth to a certain extent. On the basis of package type, the market is segmented into primary packaging, secondary packaging, and labeling and serialization equipment. In 2017, the primary packaging equipment segment accounted for the largest share of 80.5% in the pharmaceutical packaging equipment market. The large

share can be attributed to the rising regulatory modifications, rapid growth in the pharmaceutical industry, and rising technological advancements.
