Phenolic foam board is recognized as a kind of important building insulation material. Phenolic foam board has thermal and fire performance solutions in commercial and residential buildings. It is used extensively in the building industry for a number of application areas including roofing, cavity board, external wall board, plaster board dry linings systems, floor insulation and as sarking board. Phenolic foams offer significant advantages over other insulation materials. A range of phenolic foam boards is available to suit most new buildings or refurbishment applications. The technical barriers of phenolic foam board are relatively high, and the major players are Kingspan Insulation, Asahi Kasei, Unilin(Xtratherm), Sekisui Chemical, Jinan Shengquan Group, Tenlead, Guibao, Langfang Sanxing Chemical, and Lions. These companies mainly concentrate in Japan, China, and United Kingdom. China is the largest consumer, almost 37.46% of total consumption in 2016, followed by Europe with 22.59% of consumption share. Phenolic foam board has a wide range of applications. Phenolic foam board is used in industry use and building use. Therefore, growing demand for commercial and residential buildings has driven the growth of global phenolic foam board market. The demand for phenolic foam board is expected to continue increasing

during the remaining years of the forecast period of 2017-2023. Phenolic foam board industry will usher in a stable growth space. In the past few years, the price of phenolic foam board has a little change and we expect the price will slightly lower.
