The global Phenolic Resins market was valued at 105.7 Million USD in 2021 and will grow with a CAGR of 4.03% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Phenol formaldehyde resins (PF) or phenolic resins are synthetic polymers obtained by the reaction of phenol or substituted phenol with formaldehyde. Although the industry is much dispersed and a lot of manufacturers. While the downstream market demand is relatively stable, demand growth in the Asia-Pacific region is obvious. USA is the biggest producer and consumer of phenolic resins. But in Asia region, many major players have invested in the Chinese market to increase their production capacity due to low manufacturing costs than North American and European countries. Expansion of plywood production capacities in Southeast Asia, and increase in the penetration of phenolic resins, used as wood adhesives in Indonesian plywood industry has driven the future demand of phenolic resins in the Southeast Asia market.
