Abstracts

The global Phosphate for Food market was valued at 246.46 Million USD in 2021 and will grow with a CAGR of 1.81% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Food-grade phosphates are used in the production of foods to function as buffers, sequestrants, acidulants, bases, flavors, cryoprotectants, gel accelerants, dispersants, nutrients, precipitants, and as free-flow (anticaking) or ionexchange agents. The actions of phosphates affect the chemical leavening of cakes, cookies, pancakes, muffins, and doughnuts; the even melt of processed cheese; the structure of a frankfurter; the bind and hydration of delicatessen meats; the fluidity of evaporated milk; the distinctive flavor of cola beverages; the free flow of spice blends; the mineral content of isotonic beverages; and the light color of par-fried potato strips. Globally, the food-grade phosphate market is mainly driven by growing demand for meat, sea food and beverage which account for nearly 75% of total downstream consumption of food-grade phosphate in global in 2016. Based on types of food-grade phosphate available in the market, the report segments the market into STPP, SHMP, SAPP, TSPP and other food-grade phosphate (DSP, TSP, STMP, etc.). The market for STPP accounted for the largest market share in 2019, followed by SHMP, SAPP and TSPP, etc. According to our research and analysis, manufacturers from China, USA, Germany, France, Belgium, Mexico, Thailand, Japan, etc., are the leaders in global market of food-grade

phosphate. Despite the presence of competition problems, limiting of natural resources and low industry profits, there are few investments to enter the field at present. At present, the major manufacturers of food-grade phosphate are ICL Phosphate Specialty, Innophos, Prayon, Budenheim, Xingfa Chemicals Group, Blue Sword Chemical, Fosfa, Chengxing Industrial Group, Orbia (Quimir), Wengfu Gene-Phos Chem, Chuandong Chemical, Hens, Thermphos, Aditya Birla Chemicals, Mianyang Aostar, Rin Kagaku Kogyo, Tianjia Chem, Nippon Chemical, Tianrun Chemical, Huaxing Chemical, Hindustan Phosphates; the revenue of top ten manufacturers accounts about 62% of the total revenue in 2019. The high-end products mainly come from Europe and North America.
