The global Phosphorus Pentasulfide market was valued at 49.68 Million USD in 2021 and will grow with a CAGR of .52% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Phosphorus pentasulfide is the inorganic compound with the formula  $P_2S_5$  or dimer  $P_4S_{10}$ . This yellow solid is the one of two phosphorus sulfides of commercial value. Samples often appear greenish-gray due to impurities. It is soluble in carbon disulfide but reacts with many other solvents such as alcohols, DMSO, and DMF. Report data showed that 43.53% of the Phosphorus pentachloride market demand in Lubricant Additives, 31.47% % in Pesticides industry, and 10.74% in Mining Flotation Agents industry in 2016. With the development of economy, these industries will need more Phosphorus pentachloride. So, Phosphorus pentachloride has a huge market potential in the future. Besides, top class Phosphorus pentachloride will be the trend in the coming years. Compared with other types, top class Phosphorus pentachloride has better performance. Manufacturers engaged in the industry are trying to produce top class Phosphorus pentachloride through improving manufacturing process. It is predicted that top class Phosphorus pentachloride will become the mainstream product in the future. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend according to the economy development status. Also, there will be fluctuation in

gross margin.
