## Abstracts

The global Phytoestrogen Supplements market was valued at 3522.5 Million USD in 2021 and will grow with a CAGR of 4.56% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Phytoestrogens are plant-derived xenoestrogens which are used to address issues associated with the decline of estrogen secretion during menopause. Asia Pacific was the fastest growing region for the global phytoestrogen supplements market in 2017. Factors such as increasing awareness for women health, growing nutraceutical industries within the region and presence of rapidly developing healthcare within the region drives the market growth within the region.
