The global Pinch Valve market was valued at 214.68 Million USD in 2021 and will grow with a CAGR of 3.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A pinch valve is a full bore or fully ported type of control valve which uses a pinching effect to obstruct fluid flow. There are a few types of pinch valves based upon application. Worldwide, Europe is the largest market of Pinch Valve, both in production volume and consumption volume market, while Germany is the largest contributor. It is estimated that Europe accounts for half of the industry total revenue and consumes about 37% of industry total consumption value. In 2015, China produces about 3.8% of the global total production volume. But most of the Pinch Valves produced in China are low-end products, most of which are quite cheap. So, on the production revenue, China only accounts for about 2.4% of the global total revenue. The market in other developing countries or regions, such as Southeast Asia and South America is becoming the most important emerging consumption market of Pinch Valve. And the production technology and production scale of Pinch Valve in these regions are also developing quickly, partly driven by the capacity movement from developed countries.
