The global Pipeline Expansion Joints market was valued at 1839.09 Million USD in 2021 and will grow with a CAGR of 1.51% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A typical expansion joint is comprised of one or more metal bellows (most commonly stainless steel) or from materials such as rubber, fabric or plastic such as PTFE. While materials such as rubber, plastic and fabric have their limitations, metal is the most versatile of all materials. Metals are suitable for use at high temperatures, have high strength properties and are resistant to corrosion. The largest share is taken by Trelleborg , Witzenmann and Senior Flexonics, which together account for a market share of 33% in the global Pipeline Expansion Joints industry. Geographically, Europe represents the largest piece of this industry with 28 percent of the world total, followed by China at 26 percent and North America at 24 percent. The Pipeline Expansion Joints market has witnessed significant growth in the past few years, and is expected to maintain this trend during the forecast period.
