Abstracts

The global Plasma Cutting Torches market was valued at 196.11 Million USD in 2021 and will grow with a CAGR of 4.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Plasma cutting torches usually use a copper nozzle to constrict the gas stream with the arc flowing through it. That arc jumps from an electrode in the torch to something else - usually the conductive material being cut. That's a 'transferred arc'. There are some systems that use a 'non-transferred' arc where it jumps from the electrode back to the nozzle, but those are not usually used for cutting. So that means that plasma cutting is only used for materials that are conductive, primarily mild steel, stainless steel, and aluminum. But lots of other metals and alloys are conductive too, such as copper, brass, titanium, monel, inconel, cast iron, etc. The problem is that the melting temperature of some of those metals makes them difficult to cut with a good quality edge. According to the Segmentation of types, all the market of Plasma Cutting Torches can be divided as follows: The first main kind is Low Frequency it hold a comparatively larger share in global market, which accounts for about 64% in 2019. Another main kind is High Frequency, High Frequency share the rest about 36% market share in 2019. From the view of region, North America have a larger market share in 2019 which account for nearly 32%. Europe and Asia-Pacific hold a market share of about 28% and about 31%. The world leading players in the Plasma Cutting Torches market are Colfax

Corporation(ESAB), Abicor Binzel, Lincoln Electric, IKA, Hypertherm, Inc., ITW(Miller) and so on. These Top 5 companies currently account for more than 49% of the total market share.
