Abstracts

The global Plastic Caps & Closures market was valued at 15.36 Million USD in 2021 and will grow with a CAGR of 4.64% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Caps & Closures are an important part of packaging and containers such as bottles, cans, tubes, stand-up Pouches and others. Often, they do not only serve to open the container, but also offer the option to reseal it. Due to the fragile properties of glass and its high cost, the demand for glass bottles is decreasing throughout the world and its place is being taken by plastic bottles and containers. PET bottles are being preferred over glass as they are easy to transport over long distances and to avoid breakages.
