Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Plastic strapping are available in different types of materials such as polypropylene, polyester and composite. Plastic strapping materials find application in various industries such as food & beverages, automotive, transportation & logistics, building & construction, textile and others. Plastic strapping materials market has witnessed continuous growth from past three years owing to an economical and secure unitizing solution for strapping as compared to steel strapping. Due to sharp edges of steel strapping, it is difficult to handle manually and can be hazardous to an individual who is engaged in strapping operation. Plastic strapping materials are easy to handle and can be removed or attached manually.
