The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Plastic waste management is a collective term for various approaches and strategies used to recycle plastic materials that would otherwise be dumped into landfills, or bodies of water, or otherwise contaminate the environment. The idea behind this type of waste management is to utilize those discarded materials to manufacture new plastic products without the need to actually generate additional plastic materials. Doing so can help lower production costs as well as protect the environment. The demand of plastics is huge and every year thousands of tones plastics is made, in turn much plastic waste would be generated and needs to be dealt with. Plastic Waste Management is aimed to reasonably deal with the plastic waste in order to protect the environment and save resources. Plastic Waste Management can help reduce the manufacturing cost of companies by recycling the materials. The treatment methods include landfill, recycle and incineration. Landfill is the main method adopted and about 44773 K MT was treated by landfill in 2016. Plastic Waste Management companies include Veolia Environnement, Suez Environnement, Waste Management, Republic Services, Stericycle, Clean Harbors, ADS Waste Holdings, Progressive Waste Solutions and Covanta Holding. Veolia Environnement owns the biggest plastic waste treatment

capacity and in 2016 Veolia Environnement dealt 1333 K MT plastic waste. In future, for one hand the resources will be more and more valuable and the environment protection will be paid more attention on for another hand due to its unique characteristics plastics will be still well received and lots of waste will be made. So plastic waste management will be the important method to connect the environment protection and resource saving.
