The global Platelet Agitator market was valued at 388.47 Million USD in 2021 and will grow with a CAGR of 2.71% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Platelet Agitators offer a wide range of storage capacities and provide a continual side-to-side motion for the safe storage of platelets. They feature sturdy, one-piece perforated drawers with non-slip texture coating for uniform air circulation for platelets. Rollers and glides allow the drawer storage platform to agitate smoothly, eliminating the need for ball bearings which wear down and squeak. The market for platelet agitator is growing steadily with increasing need of development in biomedical industry. Moreover, in recent years the investment for biomedical R&D by Asian countries like china, South Korea, India, Japan and others subsequently increased.
