The global Plating Equipment market was valued at 65.82 Million USD in 2021 and will grow with a CAGR of 4.11% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Plating equipment refers to machinery that produce standard sample before printing. CTP (Computer to Plate) is the core of plate-making technology mainstream, which is the direct plate-making technology with no need of film. From the perspective of the downstream market, commercial CTP equipment still overwhelmingly occupy the largest market share, but the newspaper and packaging CTP equipment still occupy an important position in the market by its stable and clear consumer demand. From the plate type, thermal type CTP equipment still occupy a larger market share, but the demand for UV Type CTP equipment are gradually rising. From the breadth point of view, four open type and folio type account for market share of the same level, and they are the mainstream of product type, which will not change in short term.
