The global Poly Propylene Glycol market was valued at 1844.28 Million USD in 2021 and will grow with a CAGR of 3.19% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polypropylene glycol or polypropylene oxide is the polymer of propylene glycol. Chemically it is a polyether. The term polypropylene glycol or PPG is reserved for low to medium range molar mass polymer when the nature of the end-group, which is usually a hydroxyl group, still matters. The term 'oxide' is used for high molar mass polymer when end-groups no longer affect polymer properties. KKPC, Mitsui Chemical and BASF are the major manufacturers in this industry, accounting for 15.40%, 16.85% and 12.84% of the revenue in 2019 respectively.
